Notable features:

Ironwork at numbers 117, and 121-123 (after 1850).

Some of these are better maintained than others; all need environmental assistance to survive. A park will be opposite which will help but they need more than that. The houses on Pratt and behind need improvement. This terrace should be rehabilitated.

Environmental context:

See comments for 125-141 S. Poppleton. These houses also look straight into Lemmon Street to the west, which view should be improved by the proposed park. The lone street tree should be matched with others of equal size.
